Hi Carolyn, for bad or good I'm glad you sent this email. I apologize for not being more diligent when I took a quick look at the SLERA last week. I had just assumed that (b) (5)

Stay tuned....

Dave

Not bugging me at all on this. I did get side tracked and took some SL. But apparently I messed this one up. I went through all my email and docs in the timeframe from submittal of the SLERA work plan to my approval of the WP and apparently I only gave you an opportunity to review my preliminary comments. They revised the WP and for whatever reason I never submitted it to you (attached signature page). Then we had discussions on the transect locations. Then they submitted info on dredge sampling results for our consideration and we said no, would not substitute for the eco assessment work we needed. The only thing I could figure out is that I was very overwhelmed with a lot of sites and other stuff during this time frame.

So, with that in mind, here is another site (b) (5)

I will contact the state today about the slag/clinkers to clarify exemption but I am leaning toward a thorough review if you can and think it makes sense. Again, I apologize for my mistake here.

Thanks
Carolyn

Hope you all had a nice Father's day weekend!

Sorry for taking so much time with this review. I think the changes look good and have no further comments. Please provide the signed cover page and I will sign and send back.

Also, please provide at least a two week notice prior to any sampling.

Thank You,

Carolyn

Carolyn,

Attached is a revised draft QAPP in response to your comments of 30 September 2015, a redline comparison to the previous QAPP text, and facility responses to your 30 September comments narrative.

Carolyn, in response to your request please find a clean and a compare version of a revised draft QAPP for EPA's review. We look forward to your comments. Please note that the revised sampling locations will require additional landowner access consents prior to commencement of that work.

Please call or email with any questions or comments.

Ron
